Dual & Single Fiber DWDM OADM

Data Center & Cloud Computing Infrastructure Solutions

Overview

DWDM Optical Add/Drop multiplexer (OADM) is a passive optical device used in WDM networks for adding and dropping one/multiple 100 GHz DWDM channels in the C-band into one or two fibers, while letting the rest of the wavelengths bypass to the needed destination. Using the DWDM technology can add effectively WDM capability to their existing and new networks, and extend the optical signals transmission distance.

DWDM OADM modules are available in single-sided (East or West) and dual-sided (East and West) configurations. With matching MUX/DEMUX units placed at each end of an optical link, multiple data channels can be combined and transmitted over a single-mode fiber trunk. The passive OADM modules can add or drop up to 4 data channels at any point along the trunk.

Highlights

- Low insertion loss
- Add/drop channels at remote sites
- Protocol transparent (support 1G, 10G etc.)
- Based on thin film optics with epoxy free optical path
- Fully compliant with CE, FCC, ISO, ITU-T G.694.2, RoHS, Telcordia GR1209 and GR1221
- Completely passive, no power or maintenance required
- Ideal for DWDM ring structures or daisy chain applications
- Various connectors are available - LC/SC/FC/ST, UPC/APC polish
- Optional monitor/1310nm port for external functions

Line Type

Dual Fiber	Single Fiber
Dual fiber DWDM OADM adds and drops optical signals of same wavelengths into two fibers, while letting the rest of the wavelengths bypass to the needed destination. The DWDM transceiver connected to DWDM OADM should have the same wavelength as the client port.	In single fiber applications, DWDM OADM adds and drops optical signals of different wavelengths into a fiber in the opposite direction. It utilizes a single fiber for both adding and dropping, which reduces overall costs, and increases the capacity of the fiber.

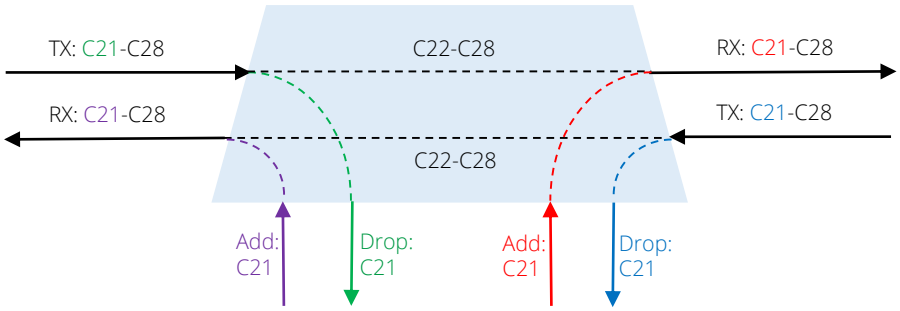
Transmission Direction

For adding/dropping DWDM channels across sites, we categorize our DWDM OADM in two groups: single-sided (East or West) and dual-sided (East and West).

If DWDM OADM adds/drops the wavelengths in one side on fiber network, it is the East or West module; On the contrary, it is the East and West module.

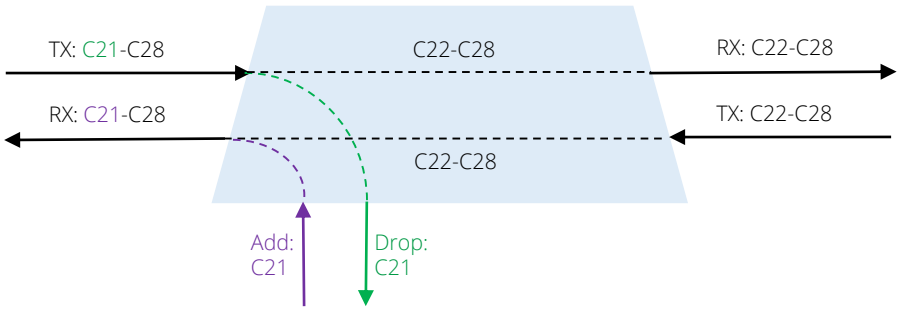
East and West

The dual-sided OADM removes one channel from the network in one direction and sends it to a local interface in one direction. It also allows a second local port to add the same channel back onto the network fiber in the opposite direction.



East or West

The single-sided OADM removes one channel from the network in one direction and sends it to a local interface. The remaining channels are passed straight through to other nodes along the network.



Special Service

Monitor Port

It is used to monitor or test the power signal, usually at a 1% ratio, 2%, 3%, 5%, etc, also available. By connecting with measurement or monitoring equipment, such as power meters, spectrum analyzer, or FMT AIU/OPD card, the signal can be inspected without interrupting the existing network.

1310nm Ports

The 1310nm is actually the WDM wavelength. Many optical transceivers support long-haul transmission over this wavelength. By connecting with the same wavelength optical transceivers, this port can be used to add 1310nm wavelength into existing DWDM networks.

PS:

DWDM Mux/Demux can't add 1550nm port due to DWDM wavelength range near 1550nm wavelength.

Monitor port

Ensure easy troubleshooting without downtime, 1% ratio as default, 2%, 3%, 5%, etc, also available.

OR

1310nm port

Allow existing legacy 1310nm traffic to be added such as 1000Base SFP LX, 10G SFP+LR

Type of Special Port	Pass Band Wavelength Range	Reflection Band Wavelength Range	Wavelength that can't be Used
1310nm port	T1260~1360nm	R1380~1620nm	1270nm,1290nm,1310nm, 1330nm,1350nm,1370nm

Housing & Enclosure

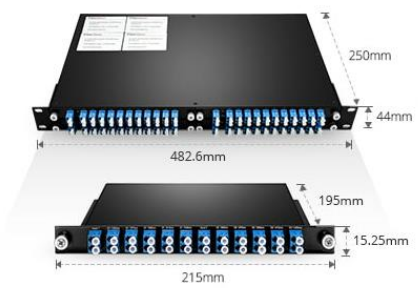
FS.COM provides 4 different package options for DWDM OADM, including FMU&FUD plug-in module, ABS pigtailed module and 1U 19" rack mount, as well as the matched chassis.

DWDM OADM Optional Housing

FMU 2-slot 1U Rack

FMU Plug-in module

FUD 4-slot 1U Rack



FUD Plug-in module

1U 19" Rack Mount

ABS Pigtailed module

0.9mm/2.0mm/3.0mm cable diameter can be customized.
