

ST UPC Simplex Fiber Keystone Jack

Overview

These fiber keystone jacks are used for connecting two ST fiber optic cables to extend the length of the cable run. The fiber keystone jacks are designed to snap easily into keystone patch panels or wall plates with standard openings, which allows you to route cables through walls and provides a convenient connection to your fiber network, making it a great solution for bringing fiber to the home and office. FS provides fiber keystone jack with LC/SC/ST connectors, including single mode and multimode, which have high precision and low insertion loss.

Benefits

- $\leq 0.2\text{dB}$ (Typical) Low Insertion Loss
- Zirconia Ceramic Sleeve with High-precision Alignment
- Sturdy Snap-in Construction for Fast and Tool-less Installation
- Used for Keystone Wall Plates or Panels with Standard-sized Keystone Openings
- One-piece Dust Cap Keeps Adapter's Interior Clean from Dust

Product Specification

Specification	ST UPC Simplex Fiber Keystone Jack	
#ID	#151824	#151825
Connector Type	ST-ST	ST-ST
Fiber Mode	Single Mode	Multimode
Polish Type	UPC	UPC
Body Style	Simplex	Simplex
Insertion Loss	≤0.2dB	≤0.2dB
Mounting Type	Reduced Flanged	Reduced Flanged
Durability	1000 times	1000 times
Flammability Rate	UL 94V-0	UL 94V-0
Operating/Storage Temperature	-25 to 70°C (-13 to 158°F)	-25 to 70°C (-13 to 158°F)
