

# 40mm Ribbon Fiber Fusion Splice Protection Sleeves for 8/12 Fibers

## Overview

This product is made up of cross-linked polyolefin heat-shrinkable tubes, hot melt tubes, and ceramic rods. It is specifically designed to provide strength members and protection to fiber optical splices.

Fiber optic splice protection sleeves for ribbon fibers protect mass fusion ribbons with up to twelve fibers.

## Benefits

- Provide Mechanical and Environmental Protection for Fusion Splices
- A Ceramic Rod for Ribbon Fiber Splices to Ensure Proper Alignment and Rigidity
- Transparent Heat Shrinkable Tube for Simple Centering of Splice and Installation Verification
- Extended Liner Length Prevents Contact Between the Fiber and Their Backbone
- Compatible with All Common Fiber Coatings and Oves

## Product Specification

| Specification       | 40mm Ribbon Fiber Fusion Splice Protection Sleeves for 8/12 Fibers |
|---------------------|--------------------------------------------------------------------|
| #ID                 | #215025                                                            |
| Product Type        | Fiber Protection Sleeve                                            |
| Application         | Mass Fusion Splices                                                |
| Length of Tube      | 40mm                                                               |
| Working Temperature | -55 to 100°C (-67 to 212°F)                                        |
| Packaged Quantity   | 50pcs/pkg                                                          |
| Weight              | 100g                                                               |
