

French-style Single Gang Keystone Faceplate, Identification Icons, White

IDEAL FOR HOME THEATER, VOIP OR ETHERNET IN-WALL WIRING INSTALLATIONS

Overview

The faceplate is a compact, robust, and aesthetic design that allows for easy insertion of a variety of snap-in jacks. The faceplates are designed to fit a range of trunking designs and have been thoroughly tested to ensure excellent retention within trunking. The faceplates are fully compatible with standard keystones.

Use where a one-piece, single-gang, economical flush-mount housing is desired. The keystone wall plate can accept keystone modules and is designed to support voice, data, and other communication needs distribution to the work area for commercial or residential applications.

The plates give the installation versatility to install only the jacks needed and provide a professional appearance while keeping the wiring organized.

Benefits

- Mountable in 90-degree Orientations
- Mount to Back Box and Compatible with Keystone Modules
- Includes Snap-in, Color-coded Port Identification Icons for Easy Identification
- Shuttered Cover Protects the Modules From Dust and Debris
- High-quality 80 Shore Degree ABS Material Ensures Ultimate Durability and Long Life

Technical Specification

Parameter	Value
